

- Īpašības
- Support surfaces on the bottom
- high suction force with small dimensions
- minimal priming
- high lateral forces realized
- good stability in the sucked state
- fastest cycle times
- Pieteikums platība
- Handling of parts with plain to an slightly rough surface like sheets, cartons, glass, plastics

Apraksts

Robust and hard-wearing suction pad with a single sealing lip. Used wherever objects (parts, packing materials, etc.) need to be lifted, transported, turned over or handled in some other manner. It is also ideal when it is necessary to handle smooth or slightly rough surfaces. Due to its flat shape, it can grip the workpiece in a very short time and withstand the forces that result from fast movement of the object during handling. It acts as the connecting element between the vacuum generator and the workpiece.
