## K-PROP VENTIL WA 24 V DO

Temperatūras diapazons

Max. 50 °C (G 1/8), Max. 90 °C (G 1/4, G 3/8)

Darba vides

Air, neutral gases, water, oil

Spiediena diapazons

Vacuum (max. 8 bar)

Vadība

Via plug amplifier 0 to 10 V, 0 to 20 mA, 4 to 20 mA

Drošinātāja rīcība

Tight closure in case of loss of voltage

Iekšējās daļas

Stainless steel

Korpuss, vārsta ligzda

Brass

Vārsta disks

FKM

Blīvējums

FKM

## **Apraksts**

Ever increasing requirements with regard to quality, precision, productivity, convenience, user friendliness and service represent tough challenges for industrial plant and production facilities. These challenges can only be mastered if physical quantities such as temperature, pressure, force, speed, torque, etc. are optimally adapted to the operating conditions of each installation. Stepless adjustment of these parameters is vital. <br&gt;Proportional valves allow the medium to be varied as a function of an electronic input variable. &lt;br&gt;By linking these valves to the electronics, it is possible to improve their accuracy and broaden their range of applications. A pressure regulator, for instance, needs to be suitable for several pressure ranges without having to adjust the pressure manually. &lt;br&gt;Proportional valves control the output pressure in a closed control loop proportionally to the selected setpoint signal. This output pressure, in other words, is continually compared with the specified setpoint and automatically adjusted according to actual parameter values.

## Norādot
